

**AMENDMENTS TO THE CLAIMS**

Please amend claims 46 and 54 as indicated below, wherein deleted material is shown by strikethrough and added material is underlined. In addition, please cancel claims 1-45, 48, 50-53, and 55 and add claim 56. A complete listing of claims pending in the application following entry of this Amendment are presented as follows:

1-45. (Cancelled)

46. (Currently Amended) An article of apparel at least partially formed from an interlooped textile, the textile comprising:

a first yarn that exhibits a dimensional-transformation upon exposure to water, the first yarn having a first set of dimensions when unexposed to the water, and the first yarn having a second set of dimensions when exposed to the water; and

a second yarn that is substantially dimensionally-stable upon exposure to the water, the textile having a first surface and an opposite second surface, the first yarn being substantially concentrated at the first surface, a structure of the textile being modified by exposing the textile to the water such that the first yarn ~~transform~~ transforms from the first set of dimensions to the second set of dimensions to form a plurality of nodes on the first surface, each of the nodes being at least partially formed from a plurality of segments of the second yarn.

47. (Original) The article of apparel recited in claim 46, wherein the first yarn and the second yarn are mechanically-manipulated to form a double knit structure.

48. (Cancelled)

49. (Original) The article of apparel recited in claim 46, wherein the nodes impart a texture to the textile on the first surface.

50-53. (Cancelled)

54. (Currently Amended) A method of manufacturing an article of apparel from a textile, the method comprising steps of:

selecting a first yarn with a first degree of water absorbency and a first degree of dimensional-transformation upon exposure to water;

selecting a second yarn with a second degree of water absorbency and a second degree of dimensional-transformation upon exposure to the water;

mechanically-manipulating the first yarn and the second yarn to form a textile with a structure that is modified from a first structure to a second structure upon exposure to the water to change a property of the textile, the second structure having ~~one of an increased permeability and the formation of~~ a plurality of nodes in comparison with the first structure, each of the nodes being at least partially formed from both the first yarn and the second yarn.

55. (Cancelled)

56. (New) The method recited in claim 54, wherein the step of mechanically-manipulating includes forming the textile to have a double knit structure.
